Module 04: Search And Discovery

Last updated: April 29, 2026.

Objectives

- Use script search and filters.
- Understand embedding-backed similarity.
- Compare exact keyword results with meaning-based results.

Walkthrough

1. Open Scripts.
2. Search for a cmdlet or title.
3. Apply category or tag filters.
4. Search by natural language, such as `active directory onboarding`.
5. Compare exact and similar results.

Query Patterns

Query	Mode	Expected outcome
`Get-ADUser`	keyword	exact cmdlet matches
`onboarding workflow`	vector/similarity	semantically related scripts
`reset password`	hybrid	exact and similar scripts

Verification Checklist

- Search results update without a full app reload.
- Filters narrow results.
- Similar scripts make sense for the query intent.
