Lab 04: Analytics and Governance

Goal

Review analytics and define a governance checklist for script changes.

Steps

1. Open Analytics and review usage metrics.
2. Identify the highest activity area (scripts, analysis, or chat).
3. Draft a governance checklist for script approvals.

Expected results

- Analytics dashboard renders without errors
- A checklist includes review, analysis, and audit steps

Troubleshooting

- If analytics fail to load, confirm the analytics service is reachable
- Check logs for API errors
