Module 05: Operations and Governance
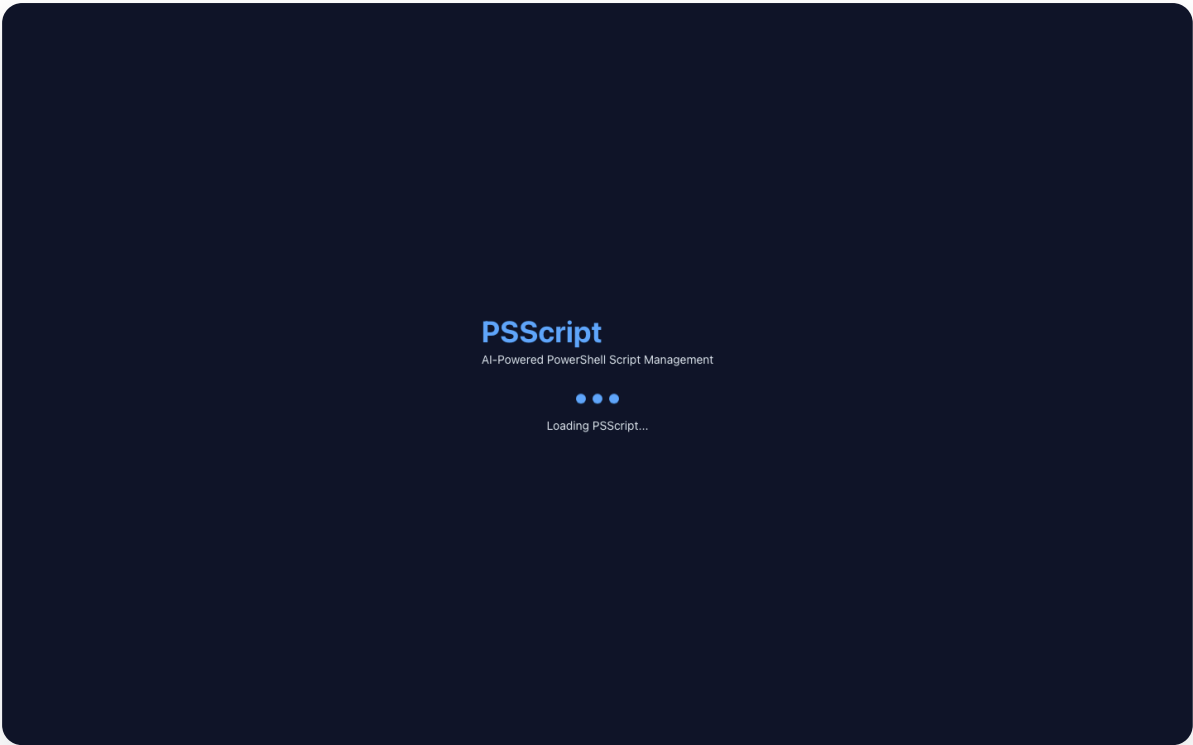

Objectives

- Monitor services and logs
- Review analytics and usage
- Apply operational checks and governance

Walkthrough

1. Open Analytics and review cost and usage metrics.
2. Review recent activity for script changes.
3. Confirm environment health via `docker-manage.sh health` or log checks.

Operations visuals

Sample Usage Metrics

320	410	260	200
Uploads	Analyses	Searches	Docs

Operational signals

Signal	Source	Target
Analysis success rate	Analytics	>= 95%
Upload dedup hits	Scripts	Stable, no spikes
Top failing category	Analytics	Investigate weekly
Review cadence	Governance logs	<= 30 days

Operational checklist

- Database and cache healthy
- AI service reachable
- Script uploads and analysis succeed
- Errors captured in logs

Verification checklist

- You can find usage metrics in Analytics
- You can identify the most recent script activity
